Henry James (1843–1916) was an American writer. He is regarded as one of the key figures of 19th-century literary realism. He was the son of Henry James, Sr. and the brother of philosopher and psychologist William James and diarist Alice James. He was nominated for the Nobel Prize in Literature in 1911, 1912, and 1916. *A Small Boy and Others* is a book of autobiography published in 1913. The book covers James' earliest years and discusses his intellectually active family, his intermittent schooling, and his first trips to Europe. *The Turn of the Screw* is a short novel or a novella written by American writer Henry James. Originally published in 1898, it is ostensibly a ghost story that has lent itself well to operatic and film adaptation. Due to its ambiguous content and narrative skill, *The Turn of the Screw* became a favorite text of New Criticism. The account has lent itself to dozens of different interpretations, often mutually exclusive, including those of a Freudian nature. Many critics have tried to determine what exactly the nature of evil within the story is. *The Jolly Corner*, published in 1908, is considered by many to be a ghost story ranking second only to *The Turn of the Screw*. James' protagonist, Spencer Brydon, is an American of 56, returned to New York after 33 years in Europe, where he has apparently accomplished little while living off his New York rentals. His friendship with Alice Staverton, and his engagement in the development of a property awaken him to the possibilities that might have been his, had he chosen a different course of life. The ghost, if that's what it is, is that other self that might have been, and his confrontation with that self and its possibilities leads to a deeply unsettling, yet ambiguous
