

The Alhambra: A series of tales and sketches of the Moors and Spaniards

Spain, made a rambling expedition from Seville to Granada, in company with a friend, a member of the Russian embassy at Madrid. Accident had thrown us together from distant regions of the globe, and a similarity of taste led us to wander together among the romantic mountains of Andalusia. Should these pages meet his eye, wherever thrown by the duties of his station, whether mingling in the pageantry of courts or meditating on the truer glories of nature, may they recall the scenes of our adventurous companionship, and with them the remembrance of one, in whom neither time nor distance will obliterate the recollection of his gentleness and worth. And here, before setting forth, let me indulge in a few previous remarks on Spanish scenery and Spanish travelling. Many are apt to picture Spain in their imaginations as a soft southern region decked with all the luxuriant charms of voluptuous Italy. On the contrary, though there are exceptions in some of the maritime provinces, yet, for the greater part, it is a stern, melancholy country, with rugged mountains and long, naked, sweeping plains, destitute of trees, and invariably silent and lonesome, partaking of the savage and solitary character of Africa.
