

History: Fiction or Science?: Astronomical methods as applied to chronology. Ptolemy's Almagest. Tycho Brahe. Copernicus. The Egyptian zodiacs. (Volume 3)

Genueflect and admire the Almagest, which lies as the solid foundation to the entire edifice of contemporary chronology! Almagest is supposed to have been written in the II century AD by Ptolemy, the founding grandfather of astronomy. This presumably antediluvian tractate catalogues 1028 observable stars with a fairly high precision of 10-15 (arc minutes) of longitude. Now, the rotation of the Earth makes the night sky make a turn of 1 arc degree every four minutes. One arc degree consists of 60 arc minutes, which means that the sky rotation speed equals 15 (arc minutes) per one minute of time. Ptolemy's very precise measurements were simply too precise to have been performed with the existing time measurement instruments existing in the alleged II century A.D. Ptolemy of the II century A.D. had at his disposal a sundial, a clepsydra (water jug with a hole), or an sand hourglass. None of these contraptions has precision to a minute. Could he have used his Grandfather's Swiss chronometer that had a minute hand? This seems improbable considering that minute hands are a novelty introduced to clocks only as recently as 1550 AD. Has history of civilization been tampered with? Conspiracy? Nothing of the sorts. Why then the world history and especially its chronology were tampered with? Let us introduce a hypothesis that to boast, to lie, to pretend was (is?) a part of the human nature. On one hand, everybody justified the claims laid to the titles, and lands by alleged ancestry and its glorious deeds. On the other hand the court historians knew only too well how to please their masters. No need for conspiracy for that. Did events and eras such as the crucifixion of Jesus Christ, the Roman Empire, the Dark Ages, and the Renaissance, actually occur within a very different chronology from what we've been told? Maybe the history of THE CIVILIZATION is both drastically shorter and dramatically different than

generally presumed, in spite of the of Homo sapiens crowd (thats us) being around for 150000 years at least and age of the planet Earth being over 4.5 billion years. Its highly unlikely that anyone told you before that there is not ONE single piece of firm written evidence or artefact that is reliably, independently and irrefutably dated older than the 11th century. The intricate pack of figmental world history as we learn it today was entirely fabricated in the 16th-18th centuries on the firm foundation laid down by Italian, French, German and English scholars, idem white and black robe clergy, idem humanists in 14th-15th centuries. Petrarca and Dante, Bracciolinni and Macciavelli, Giotto, Bernini, Da Vinci and Michelangelo Corporations not only created immortal masterpieces exceedingly well paid by Roman Popes et al and Medici Princes of Florence, but also mass produced ancient manuscripts, frescoes, statues very much in demand by the wealthy customers. Oxbridge scholars earned their daily bread & butter by cooking very Ancient Greece & Roman Empire history mostly from Italian ingredients. The Glorious Revolution in England has already taken place, the British Empire was in works and badly needed glorious predecessors like the Roman Empire. The French learned crowd made their encyclopaedic cuisine of alleged Roman Republic history preparing the French minds for an Ideal Republic to come. The French Kings out of pure spite of all things English (!) made a successful live test of Ideal Republic 1776 in British American colonies by helping American freedom fighters to free their lands from the British crown and to found The United States of America. British Empire paid back by helping French freedom fighters to make dream of the French scholars come true, to found French Republic in 1789, etc. Somehow very liberal King Louis XVI lost control, head and crown which the one Corsican Bouenaparte found in the gutter of the Revolution and became Napoleon I
