

Talk, Talk, Squawk!: A Humans Guide to Animal Communication (Animal Science)

How does a stinkbug flirt, a bee give orders, or a panda say back off? A celebrated duo is back with a guide to messaging, animal-style. Humans aren't the only creatures who are constantly talking and transmitting messages: animals find all sorts of ways to keep in touch without saying a word. They use colors, patterns, smells, movements, vibrations, sounds, and even electricity to help them identify their own family or team -- not to mention find food and shelter, defend their territory, woo the proper mate, and care for their young. From the chatter of dolphins to the click of a moth, from the stripes of a reef fish to the rumbling of elephants, this funny, fascinating book unlocks the mysteries of how animals talk and squawk to one another-- and how humans try to talk back.
