

Camper Birdhouse

This woodworking plan of a birdhouse measures 9 wide by 6 high and 8 deep. The front and back wall is 1/2 plywood and the roof is under layment plywood with saw cuts every 1/2 so the wood would bend to the shape of the walls. I chose to put the saw cuts outside but it works either way. The base measures 10x8 and I made a frame so this birdhouse could be mounted on a 4x4 post.
