

Child Case Management Practice

UK family courts dealing with public and private child law cases are inundated with work, generating huge amounts of paper. Far more effective is the creation of a file which, from the outset, focuses on material relevant to the UK judicial decision-making process. So, for each application, there should be an analysis of what the judicial hearing will actually require, with checklists, questionnaires, etc. specifying all the necessary information. Child Case Management Practice fulfills the objective for every area of child law, and: reflects the UK's new Public Law Outline * generates best practice case management documents * presents core skeleton arguments at a glance * focuses on the Case Management record * provides synopses of the law for all the major applications * reduces the amount of paperwork.
