

Creating the Visitor-centered Museum

What does the transformation to a visitor-centered approach do for a museum? How are museums made relevant to a broad range of visitors of varying ages, identities, and social classes? Does appealing to a larger audience force museums to dumb down their work? What internal changes are required? Based on a multi-year Kress Foundation-sponsored study of 20 innovative American and European collections-based museums recognized by their peers to be visitor-centered, Peter Samis and Mimi Michaelson answer these key questions for the field.

The book
-describes key institutions that have opened the doors to a wider range of visitors;
-addresses the internal struggles to reorganize and democratize these institutions;
-uses case studies, interviews of key personnel, Key Takeaways, and additional resources to help museum professionals implement a visitor-centered approach in collections-based institutions.
