

The Consolation of Philosophy: King Alfreds Version & The Theological Tractates (Two Books With Active Table of Contents)

ABOUT THE AUTHOR: Boethius was a philosopher of the early 6th century. He was born in Rome to an ancient and important family which included emperors Petronius Maximus and Olybrius and many consuls. His father, Flavius Manlius Boethius, was consul in 487 after Odoacer deposed the last Western Roman Emperor. Boethius, of the noble Anicia family, entered public life at a young age and was already a senator by the age of 25. Boethius himself was consul in 510 in the kingdom of the Ostrogoths. In 522 he saw his two sons become consuls. Boethius was imprisoned and eventually executed by King Theodoric the Great, who suspected him of conspiring with the Eastern Empire. While jailed, Boethius composed his *Consolation of Philosophy*, a philosophical treatise on fortune, death, and other issues. The *Consolation* became one of the most popular and influential works of the Middle Ages. A link between Boethius and a mathematical boardgame *Rithmomachia* has been made.
