

Management of Acute Myocardial Infarction (Frontiers in Cardiology)

Important advances in the treatment of this condition have been made following the recent publication of the results of several multicentre clinical trials. For the first time following these new developments Desmond Julian and Eugene Braunwald have brought together the worlds leading authorities to give a comprehensive and thorough analysis of the state-of-the-art clinical practice. Frontiers in Cardiology are a collection of authoritative state-of-the-art works keeping the clinical and academic cardiologist in touch with the latest developments in clinical research and practice. Each book in the series covers a topic of major importance and is written from an international perspective, by the leaders in the field.
