

Calculus with Applications, Brief Version, Books a la Carte Plus MML/MSL Student Access Code Card (for ad hoc valuepacks)) (10th Edition)

Books a la Carte are unbound, three-hole-punch versions of the textbook. This lower cost option is easy to transport and comes with same access code or media that would be packaged with the bound book. Calculus with Applications, Tenth Edition (also available in a Brief Version containing Chapters 19) by Lial, Greenwell, and Ritchey, is our most applied text to date, making the math relevant and accessible for students of business, life science, and social sciences. Current applications, many using real data, are incorporated in numerous forms throughout the book, preparing students for success in their professional careers. With this edition, students will find new ways to get involved with the material, such as Your Turn exercises and Apply It vignettes that encourage active participation. The MyMathLab course for the text provides additional learning resources for students, such as video tutorials, algebra help, step-by-step examples, and graphing calculator help. The course also features many more assignable exercises than the previous edition. This Package Contains: Calculus with Applications, Tenth Edition, Brief Version, (a la Carte edition) with MyMathLab/MyStatLab Student Access Kit
