

Strategic Inventions of the Vietnam War (Tech in the Trenches)

The Vietnam War was a conflict that divided many people and brought changes to America. It spanned from the 1950s to the 1970s and saw many new and improved technologies develop among them napalm, attack helicopters, and TV journalism. These technologies ultimately changed the way people viewed warfare. This is the story of how the war started, what its impact was, and how these technologies changed the face of a nation.
