

## The Watchmans Rattle: Thinking Our Way Out of Extinction

Why cant we solve our problems anymore? Why do threats such as the Gulf oil spill, worldwide recession, terrorism, and global warming suddenly seem unstoppable? Are there limits to the kinds of problems humans can solve? Rebecca Costa confronts- and offers a solution to- these questions in her highly anticipated and game-changing book, *The Watchmans Rattle*. Costa pulls headline for today's news to demonstrate how accelerating complexity quickly outpaces that rate at which the human brain can develop new capabilities. With compelling evidenced based on research in the rise and fall of Mayan, Khmer, and Roman empires, Costa shows how the tendency to find a quick solution- leads to frightening long term consequence. Society's ability to solve its most challenging, intractable problems becomes gridlocked, progress slows, and collapse ensues. A provocative new voice in the tradition of thought leaders Thomas Friedman, Jared Diamond and Malcolm Gladwell, Costa reveals how we can reverse the downward spiral. Part history, part social science, part biology, *The Watchmans Rattle* is sure to provoke, engage and incite change.
