

## Gold Crash: How to Profit From the Bear Market in Gold

A unique, historic combination of bearish factors are brewing for gold. Financial stability is improving, interest rates are moving up, and inflation remains weak. The deflation of the bubble in gold remains in its middle innings, as predictions of economic calamity have failed to materialize. Expectations that monetary stimulus would result in hyperinflation have proved to be misguided. In fact, gold fell 40% during the most aggressive monetary intervention in history. This book is about why gold is the **ULTIMATE BUBBLE** and methods to profit from its unwind.
